AMENDMENTS

In the claims:

This Listing of Claims replaces all prior versions, and listings, of the claims in this application.

Listing of Claims:

- 1. (Original) A method comprising:
- receiving product data for a plurality of products; receiving sales data for each of the products;
- calculating a sales trend condition for each of the products based on a current time, the sales data for each of the products, and the product data for each of the products;
 - receiving a customer request to view the products; and
- presenting a web page including a predetermined portion of the product data and a sales trend indicator representing the sales trend condition for each of the products.
- (Original) The method of claim 1 wherein receiving the sales data further comprises: processing a real sales velocity for each of the products.
- (Original) The method of claim 2 wherein calculating the sales trend condition is further based on the real sales velocity for each of the products and a set sales velocity for each of the products.
- (Original) The method of claim 1 wherein the sales trend status indicator represents how quickly each of the products is selling.
- 5. (Original) The method of claim 1 wherein the sales trend status indicator is one of a plurality of graphic images, each graphic image representing the sales trend condition.

- (Original) The method of claim 1 wherein the sales trend condition is one of a set of system defined conditions.
- 7. (Original) The method of claim 6 wherein the set of system defined conditions comprises: a first condition in which an offered quantity of a product will expire in a first time period that is less than 51 percent of a sale duration period; a second condition in which the offered quantity of the product will expire during a second time period that is between 51 and 60 percent of the sale duration period; a third condition in which the offered quantity of the product will expire during a third time period that is between 61 and 80 percent of the sale duration period; a fourth condition in which the offered quantity of the product will expire during a fourth time period that is between 81 and 99 percent of the sale duration period; a fifth condition in which the offered quantity is available; a sixth condition in which the offered quantity has expired or the sale duration period has expired.
- 8. (Original) The method of claim 1 wherein the product data comprises at least a product name, a product description, a product photo, a start time, a sale time duration, and a total quantity.
- 9. (Original) The method of claim 1 wherein presenting the web page further comprises: displaying at least a product name, a quantity available, a quantity remaining, a sale duration, a time remaining, and a product photo for each of the products.
- 10. (Original) The method of claim 1 wherein the calculating is based on a plurality of rules.
- 11. (Previously Presented) The method of claim 10 wherein the rules take into consideration a real sales velocity and a set sales velocity for each of the products.
- 12. (Original) The method of claim 11 wherein; the real sales velocity is determined by dividing the number sold by the elapsed time since the sale started; and the set sales velocity is determined by dividing the total available quantity by the sale duration.

- 13. (Original) A method comprising: receiving product data for a plurality of products; receiving a customer request to view available products; presenting a web page displaying a predetermined portion of the product data for a plurality of available products and a sales trend status indicator for each of the available products.
- 14. (Original) The method of claim 13 wherein the sales trend status indicator represents how quickly each of the available products is selling.
- 15. (Original) The method of claim 14 wherein the sales trend status indicator is one of a plurality of graphic images, each graphic image representing one of a plurality of sales trend conditions.
- 16. (Original) The method of claim 13 wherein each of the sales trend conditions is one of a set of system defined conditions.
- 17. (Original) The method of claim 16 wherein the set of system defined conditions comprises: a first condition in which an offered quantity of a product will expire with that is less than 51 percent of a sale duration period remaining; a second condition in which the offered quantity of the product will expire with between 40 and 59 percent of the sale duration period remaining; a third condition in which the offered quantity of the product will expire with between 20 and 39 percent of the sale duration period remaining; and a fourth condition in which the offered quantity of the product will expire with between 1 and 19 percent of the sale duration period.
- 18. (Original) The method of claim 13 wherein the product data comprises at least a product name, a product description, a product photo, a start time, a sale duration, and a total quantity.
- 19. (Original) The method of claim 13 wherein the presenting further comprises: displaying at least a product name, a quantity available, a quantity remaining, a total time, a time remaining, and a product photo.

- 20. (Original) The method of claim 13 wherein the presenting further comprises; calculating a sales trend condition for each of the available bargain countdown products.
- 21. (Original) The method of claim 20 wherein the calculating is based on a plurality of rules.
- 22. (Original) The method of claim 21 wherein the rules take into consideration a real sales velocity and a set sales velocity for each of the available products.
- 23. (Original) A method comprising; presenting a plurality of available products; receiving a customer purchase request for a selected product of one of the products; updating a real sales velocity for the selected product responsive to receiving; updating a current quantity and an actual quantity based on at least one of the real sales velocity and a set sales velocity for the selected product; applying a plurality of rules regarding the selected product to determine a product status; receiving a request to view available products; and presenting product data for available products, including a predetermined portion of the product data, including the current quantity for the selected product and the product status for the selected product.
- 24. (Original) The method of claim 23 wherein: the real sales velocity is determined by dividing the number of sales of the selected product by the elapsed time since the sale of the selected product started; and the set sales velocity is determined by dividing the total available quantity of the selected product by the sale duration set for the selected product.
- 25. (Original) The method of claim 23 further comprising: decrementing the current quantity based on the set velocity; and decrementing the current quantity and the actual quantity based on the real velocity.
- 26. (Previously Presented) A system comprising:
 - a computing device coupled to a wide area network:
- a server computer coupled to the wide area network having instructions stored thereon which when executed cause the server to perform operations comprising:

receiving product data for a plurality of products; receiving sales data for each of the products;

calculating a sales trend condition for each of the products based on a current time, the sales data for each of the products, and the product data for each of the products;

receiving a customer request to view the products, the customer request issued by a customer via the computing device; and

presenting a web page over the wide area network to the customer at the computing device, the web page including a predetermined portion of the product data and a sales trend indicator representing the sales trend condition for each of the products.

- 27. (Original) The system of claim 26 wherein calculating the sales trend condition is further based on a real sales velocity for each of the products and a set sales velocity for each of the products.
- 28. (Original) The method of claim 27 wherein; the real sales velocity is determined by dividing a number sold by an elapsed time since a sale started; and the set sales velocity is determined by dividing a total available quantity by a sale duration.
- 29. (Original) The method of claim 26 wherein the sales trend status indicator is one of a plurality of graphic images, each graphic image representing the sales trend condition.
- 30. (Original) The method of claim 26 wherein the sales trend condition is one of a set of system defined conditions comprising: a first condition in which an offered quantity of a product will expire in a first time period that is less than 51 percent of a sale duration period; a second condition in which the offered quantity of the product will expire during a second time period that is between 51 and 60 percent of the sale duration period; a third condition in which the offered quantity of the product will expire during a third time period that is between 61 and 80 percent of the sale duration period; a fourth condition in which the offered quantity of the product will expire during a fourth time period that is between 81 and 99 percent of the sale duration period.
